MedSmart™
Medication Management System

Connected and Protected

MedSmart is a personalized adherence device that organizes, reminds, and dispenses medications so they are taken properly and on-time.

At set times during the day, MedSmart will beep, flash, and rotate, making the proper pills available for consumption. Just tilt the device and the correct pills will be dispensed, while all other doses remain safe and secure.

MedSmart is also available with event reporting and notification that allows family, caregivers, and healthcare professionals to proactively support independent living.

Through this personalized notification system, alerts can be sent to track adherence, address dosing errors, and predict refill requirements. MedSmart helps provide the right medication in the right dose at the right time.

Live with confidence.

*“If patients took their medication as directed, up to 23 percent of nursing home admissions, 10 percent of hospital admissions, many physician visits, many diagnostic tests and many unnecessary treatments could be avoided.”**

Who is it for?

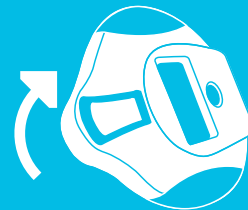

A wide variety of users can benefit from MedSmart’s state-of-the-art technology, including people who have:

- Multiple prescriptions
- Difficulty organizing pills
- A hard time remembering
- Dexterity issues
- Difficulty reading labels
- A risk of misdosing

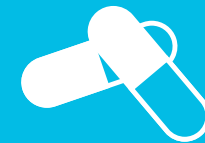

MedSmart improves adherence to medication regimens, reduces the risk of dosing errors, and improves clinical outcomes and quality of life.

Visual and audio signals indicate when it is time to take medication

Tilt device and the correct pills will be dispensed

Take medication. Device and all other medication doses remain safe and secure until the next scheduled dosing
