

Giving you the independence and confidence to remain where you want to be... at home.

Independence Solution

CEL Home-Based Cellular Personal Emergency Response System

CEL

Console and Personal Activator

Key Features

- No landline needed
- SIM and cell service managed by Tunstall*
- Audio messages available in English or Spanish
- 30 hour back-up battery
- Enables two-way voice communication between subscriber and Emergency Call Center Operator
- Integrated programmable keypad
- Supports multiple personal activators
- Compatible with iVi Intelligent pendant with fall detection**
- Tunstall is FDA registered, complies with all medical device regulations, and is ETL listed to conform with UL 1635 and UL 1637 product safety standards.
- Compact lightweight activator design; can be worn as a necklace or bracelet (belt clip may be ordered separately)
- 390ft activator range
- Water resistant personal activator designed to be worn in shower or bath
- Compatible with Tunstall Flood Detector and Tunstall Smoke Detector

*The CEL requires a satisfactory GSM cellular network connection to operate as intended. Coverage may not be available in all areas and may change after system activation due to a number of factors.

**Fall detection feature does not detect 100% of falls. If able, users should always press their help button when they need help.

CEL

Home-Based Cellular Personal Emergency Response System

The CEL is a Personal Emergency Response System which utilizes a cellular network to communicate with our Emergency Response Center (ERC). A landline or traditional phone service is not required. The CEL system includes a two-way voice base console and one personal activator which can be worn as a lanyard, wristband, or belt clip.

Subscribers call for help by pressing the button on their personal activator or CEL console. The call is sent to the 24-hour ERC. The ERC operator communicates with the subscriber through the CEL console's loudspeaker and microphone to determine the nature of the call and the appropriate course of action.

The CEL is compatible with our iVi Intelligent Pendant with fall detection and can automatically trigger a call to our ERC if a fall is detected.**

Connected and Protected

Recognizing that people rely upon us 24/7, our Emergency Response Center (ERC) is built with the most advanced infrastructure of equipment to optimize response time and improve service reliability.

If you cannot speak or be heard, our Emergency Response Center knows who you are and who to contact.

When you enroll, a personalized file is created in our HIPAA compliant, secure database containing all critical information. This information is immediately displayed so that a trained operator can respond quickly to assist you.

- 24/7/365 Emergency Response Centers
- Over 50 years experience in remote care and safety monitoring
- Two US-based Emergency Response Centers
- Over three million subscribers monitored worldwide
- Notification to emergency responders, caregivers, and/or family
- 140 languages available at our Emergency Response Centers
- Highly trained and qualified Emergency Response Center operators
- Providing peace of mind for those in need

When seconds count, the CEL Medical Alert can make a vital difference. According to the New England Journal of Medicine, getting help within one hour after a fall improves survival rate by more than 90%.

When you need help, press the personal activator.

The two-way voice console dials the 24-hour Emergency Response Center. Emergency Response Center operator speaks with you over the console to decide on proper action.

Emergency Response Center operator coordinates the appropriate responder - emergency services, caregiver, family member, or neighbor.
