The belle® is a small, lightweight, mobile Personal Emergency Response System that enables seniors and individuals with special needs to live independently and call for help anytime, anywhere in the U.S. where there is cellular coverage. The product features simple one button access, two-way voice communication, Location Assistance Technology,* and a battery that lasts up to 30 days on a single charge.**

Subscribers call for help, anywhere or anytime, by pressing the belle® call button. The call is sent to our 24-hour Emergency Response Center (ERC) where trained operators can access call details (subscriber's name, address, and relevant information) that are displayed on their screen.

If a subscriber is unable to confirm their location during an emergency, the device's location assistance technology can be used by dispatchers to help direct responders to the subscriber.

When seconds count, the belle® Mobile Personal Emergency Response System can make a vital difference. According to the National Institute for Health, getting help within one hour after a fall improves survival rate by more than 90%.

Connected and Protected

Recognizing that people rely upon us 24/7, our Emergency Response Center (ERC) is built with the most advanced infrastructure of equipment to optimize response time and improve service reliability.

If you cannot speak or be heard, our Emergency Response Center knows who you are and who to contact.

When you enroll, a personalized file is created in our HIPAA compliant, secure database containing all critical information. This information is immediately displayed so that a trained operator can respond quickly to assist you.

- 24/7/365 Emergency Response Centers
- Over 50 years experience in remote care and safety monitoring
- Two US-based Emergency Response Centers
- Over three million subscribers monitored worldwide
- Notification to emergency responders, caregivers, and/or family
- 140 languages available at our Emergency Response Centers
- Highly trained and qualified Emergency Response Center operators
- Providing peace of mind for those in need

When you need help, press the belle's call button.

The two-way voice unit dials the 24-hour Emergency Response Center. Emergency Response Center operator speaks with you over the console to decide on proper action.

Emergency Response Center operator coordinates the appropriate responder - emergency services, caregiver, family member, or neighbor.
